SUPERGIARA JERSEY

**OVERVIEW**  
Our top-of-the-line gravel jersey, completely revised and updated. Six pockets, reflective elements and an aerodynamic fit. Being efficient and minimizing stops: that's how you get to be the first to pop open a beer at the end of a gravel race.

FEATURES				
<ul style="list-style-type: none"><li>3D polyester fabric for greater breathability, combined with interlock in areas subject to load and stress</li><li>6 back pockets for maximum cargo capacity</li><li>Reflective elements on shoulders, sides and back</li><li>Gripper elastic at bottom and YKK® zip</li></ul>

ROCK SUIT LONG SLEEVE

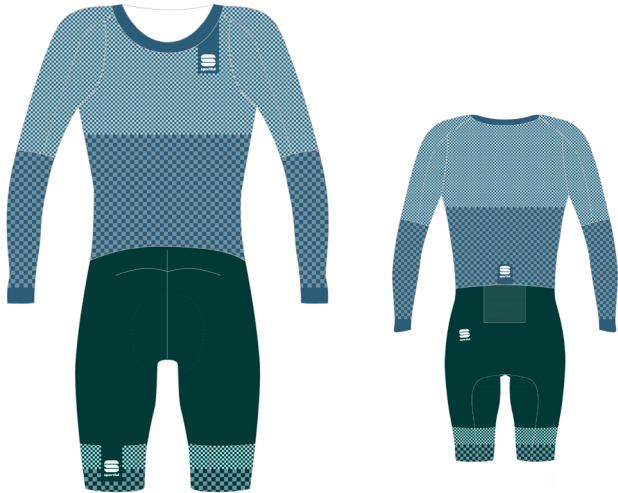

OVERVIEW

A time trial skinsuit developed together with the BORA-hansgrohe team, tested in the wind tunnel and in the most important time trials of the Grand Tours. The result is an innovative garment that uses advanced fabrics and technical features to ensure maximum aerodynamics and unprecedented comfort.

FEATURES

- Zipper positioned on the shoulders to improve aerodynamics and fit
- Pocket for race number on back
- Fabrics optimized in the wind tunnel to obtain a structure that is elastic and maximizes aerodynamics

PRO W VEST

OVERVIEW

Can a lightweight vest protect you better than a heavier one? We've shown that it can, with the new Pro Vest, developed with the BORA-hansgrohe team to provide the best front and side protection in a vest that is extremely compactible and easy to stow in a jersey pocket.

FEATURES

- Front and side protection with lighter weight on back
- Vest can be stuffed inside your jersey
- Lightweight internal elastic around armholes to ensure close fit
- Reflective logos on front and back

0702205 BODYFIT THERMAL JERSEY LS

**OVERVIEW**  
This jersey was fine-tuned by our WorldTour riders, and it is exactly the same piece that they have in their wardrobe. It features a brushed fabric to keep you warm and comfortable and the typical close fit of a pro-level garment. We reexamined every detail to improve this version. It's excellent with other layers, or you can wear it alone on warmer days.

<b>FEATURES</b> <ul style="list-style-type: none"><li>Double-layer printed jersey</li><li>Sleeves and side panels in brushed stretch fabric, with raw cut ending on the sleeves.</li><li>Covered front YKK® Vislon® zip</li></ul>

# SEATPADS

## BODYFIT PRO SEATPAD

For many this would be the perfect pad. It was true for Sportful as this pad was used for our best bibshorts when Alberto Contador was performing Il Pistolero in his best Tour de France years. It was developed in a highly-competitive scenario and still today, our Bodyfit Pro Seatpad is able to assist you in your rides thanks to the anatomical design, to the micro-perforations of the foam padding in variable thickness, to the absence of stitches.

## TC PRO SEATPAD

Our racing pad more than any other. All the cosy features of the Total Comfort pad, adjusted for a performance situation. Urethane foam padding goes up to 15 mm thickness, with extra layers on the rest of the surface. The pad is perforated to guarantee a higher ventilation, quicker drying and more freedom of movement. A performance-oriented pad, perfect for long, intense rides.

## DMS SEATPAD

A brand new pad specifically designed for dirty roads., with different densities on the pad to make the real difference. The open-cell foam padding is fast in the drying process. The pad is lighter and also shorter in length, as it is developed for a more erect bike drive, just like on dirt and gravel roads.

## BODYFIT TT SEATPAD

The Bodyfit TT Seatpad is specifically designed and developed for time trial races. The padding is minimal and designed to facilitate an aerodynamic position on the bike.

## KID PRO EVO SEATPAD

A junior version of Comfort Pro insert. 2 sizes that match with growing bodies. Unisex construction moves well with the body and mocrifiber fabric has soft smooth finish and antibacterial surface treatment. Open cell foam with variable thickness for maximum comfort. Lower density appropriate for the light bodyweight of junior riders.

## TC PRO W SEATPAD

Our racing pad more than any other, specifically designed for women. All the cosy features of the Total Comfort pad, adjusted for a performance situation. Urethane foam padding goes up to 15 mm thickness, with extra layers on the rest of the surface. The pad is perforated to guarantee a higher ventilation, quicker drying and more freedom of movement. A performance-oriented pad, perfect for long, intense rides.

## INFINITY W SEATPAD

An update to most comfortable and padded women's seat pad ever. The bioceramic top cloth is softer than ever, while 3 layers of foam provide progressive cushioning, meaning you never bottom out. A very soft upper layer means immediate comfort on your skin, a medium-density middle layer of open-cell urethane foam provides just the right cushioning with breathability, and a high-density outer layer cushions the biggest shocks.

## TRI RACE SEATPAD

Designed for perfect performance throughout the race the Tri Race pad is specifically engineered for Triathlon. With padding placed in the correct Tri saddle position, low profile foam that doesn't interfere on the run and a quick drying perforated construction to make the transition more comfortable. Triathlon optimised ergonomics. Perforated foam for quick drying. Low profile design for comfort on the run & swim. Soft microfiber surface. 5mm foam, 3mm foam.

## TRI RACE W SEATPAD

Constructed with women's specific ergonomics with all the technical features of the Tri Race pad, ideal for racing, on and off the bike. Women's specific construction. Triathlon optimised ergonomics. Perforated foam for quick drying. Low profile design for comfort on the run & swim. Soft microfiber surface. 5mm foam . 3mm foam.
